

SQUID GAME

SQUID GAME OVERVIEW!!!!!!

Brief Summary.

Squid game is a South Korean fictional show with nine episodes on Netflix. There are ~~4~~56 contestants who are in bad debts playing to win tons of cash but the downside to the game is that the losers die at the end of the game, the contestants are so hungry for the money that they even try killing each other as when a contestant dies the winning prize goes up. In total the contestants play six games from 1970s and 1980s of Korea with only **ONE** winner standing at the end. The games take place at an isolated island and the contestants are locked up till the final game. The show's intriguing premise, striking visuals and strong performances all contribute to its success. But how Squid Game really stands out is as a psychological study of the depths of human nature and as a provocative indictment of capitalism.
